Spec2TestAI™ Features	Spec2Lite™	Paradigm™	Abriz™	Unleashed™
Requirement Entry and Analysis Across 32 Best Practice Measures in 5 Categories (INVEST, SMART, REAL)		×	×	×
Generation of BDD Feature and Step Definition Files in Multiple Languages		×	×	×
Enhancement of Requirements using AI for Significantly Improved Context, Completeness, and Business Value		×	×	×
Generation of Security Requirements	*Plus	×	×	×
Removal of Ambiguities from Requirements with a 7-Point Framework	×	×	×	×
Requirements Table with 'Questions for Stakeholders'			×	×
Generated Test Cases from Requirements, Prioritized from P1 to P3	×	×	×	×
Generated Test Cases from Enhanced Requirements, Prioritized P1 to P3		×	×	×
Test Case Description, Precondition, Test Data, Test Steps, Expected Result, Edge and Negative Tests Generation	×	×	×	×
Use of Mathematical Models for Test Generation, Avoiding Ad-hoc Generation and AI Hallucination	×	×	×	×
Security Tests Generation Aligned with Functional Test Cases	*Plus	×	×	×
Coverage analysis of test cases with AI commentary on coverage gaps		×	×	×
Requirements Traceability Back to Test Cases for Audits and Retrospectives		×	×	×
Automated Testing Framework in Multiple Languages for Code Generation		×	×	×
Project Dashboard Measure of Overall Requirements and Test Health		×	×	×
UAT Test Case Generation for Agile Stakeholders			×	×
Clarification Analysis Provided for Story and Acceptance Criteria Details			×	×
JIRA Plugin for Seamless Integration and Synchronization into Spec2TestAI			×	×
Advanced Cross-analysis Features for Platform Level, Requirements Level, and Isolated Requirement Level Analysis			×	×
Cross-analysis Ratings and Metrics Providing Actionable Insights			×	×
Upload Customer Specific Project Information			×	×
Impact Analysis of changes to Requirements (on testing)				×
Integration Testing & User Journey Test Creation				×
Identify/Track 12 categories of requirements defects.				×
Analytics dashboard of all identified requirements defects.				×
Potential cost savings estimates for all tracked defects (customizable)				×
Detailed analysis of all 12 defect categories for every user story.				×
One-Click cleanup of all requirements defects.				×
Editable Test Cases				×
One-Click automation script regeneration using edited tests				×
Provides higher level of accuracy of testing assets due to much larger context window for all uploaded enterprise data				×
Unlimited AI Engagements and Uploads				×
